EXPERIENCE

Software Engineer

SAIB

June 2024 – February 2026

- **Led frontend development** for decentralized applications and web platforms using .NET Blazor and React.
- **Implemented and bootstrapped** a multi-platform wallet application across mobile, web, desktop, and browser extension environments using .NET technologies.
- **Built reusable UI component libraries** using MudBlazor and Material UI, ensuring pixel-perfect translation of Figma design systems and consistent UX across platforms.
- **Architected and developed RESTful APIs using .NET Core** to bridge frontend interfaces with complex blockchain data services and internal backend systems.
- **Engineered real-time data visualizations** by integrating TradingView charts, handling high-frequency "tick-by-tick" data updates for live market monitoring.
- **Optimized blockchain transaction workflows** and secure wallet connectivity for Cardano-based decentralized applications.
- **Collaborated across the full SDLC** to translate business requirements into technical solutions, managing PR reviews and maintaining high code quality standards.

Frontend Developer

FitIn

May 2023 – August 2023

- **Developed responsive web pages** and layouts for the FitIn platform using React and TypeScript.
- **Implemented UI components** and ensured cross-browser consistency while maintaining strict **type-safety** for frontend interfaces.
- **Collaborated with designers** to translate wireframes and Figma prototypes into functional, pixel-perfect frontend interfaces.

PROJECT

Cardano Address Balance Tracker

- **Built a Cardano address balance tracker** using Argus (.NET), enabling on-chain balance and transaction monitoring.
- **Implemented efficient blockchain data querying** and real-time address tracking.
- **Developed a responsive dashboard interface** for querying and displaying wallet balance data.

EDUCATION

Bachelor of Science in Computer Science

University of San Carlos, Cebu City, Philippines

SKILLS

Frontend: React, Next.js, TypeScript, Blazor, JavaScript (ES6+), HTML5/CSS3, Tailwind CSS, Material UI

Backend: .NET Core, ASP.NET Web API, C#, RESTful API Development, Node.js

Tools & Database: PostgreSQL, Docker, DBeaver, Figma (Design-to-Code), Git, Webpack

Specialized: TradingView Charts (Real-time), Cardano Wallet Integration, Cross-Platform Development
